Total Parco Pakistan Limited (TPPL) is committed to the quality of its products, safety, security and occupational health of its stakeholders as well as the protection of the environment. This commitment complies with the industry standards, policies and all applicable National laws and regulations relating to Health, Safety, Security, Environment, Quality & Sustainable Development (HSSEQ & SD) in all aspects of its operations.

TPPL strives to ensure the achievement of high HSSEQ & SD standards by;

1. Considering people safety, health protection, safety in operations, respect for the environment, customer satisfaction & listening to stakeholders as paramount priorities.

2. Promoting safety culture through HSE leadership at sites, consultation and participation of workers representatives, HSE training, recognition, responsive emergency response plans, incident feedback, safety alerts, return on experience, implementation of Total’s 12 safety golden rules and maintaining open communications.

3. Selection of industrial and business partners on the basis of their ability to comply with HSSE&Q policies.

4. Implementation of appropriate management policies for all its operations regarding HSSE&Q risks. Risk assessments to be conducted covering the entire life of the project or product, prior to any development and launch.

5. Implementation of HSSE&Q management systems and undergo regular assessments involving measurement of performance, milestones setting, formulating relevant action plans and organizing suitable controls. Action plans to be regularly reviewed to ensure continual improvement of HSSE&Q management system.

6. Implementation of emergency response systems, which are reviewed periodically and regularly tested during drills & exercises.

7. Individuals, through their vigilance and professionalism, at all levels are personally responsible in giving due consideration to HSSE&Q matters.

8. Monitoring and control of energy consumption and production of final wastes.

9. Implement road transport safety polices & standards covering driver’s selection & training, vehicle technical standards, truck vetting, driving & rest hours, vehicle tracking and speed limits. Action plans are regularly reviewed to ensure continual improvement of transport management system.

10. Implementation of security measures with priority to protect people, assets and information/data by conducting assessment of threats to our operations and implementing corrective actions.

11. Placing its societal commitment at the core of its responsibility. Societal approach includes initiatives in order to better integrate its activities into societal context of their host communities by developing transparent, constructive relationships with its stakeholders and by locally contributing to human, economic and social development notably in areas such as safety and access to energy.
